

# Why lease with CWB National Leasing?

Ready to supercharge your business and increase your profits?  
You've come to the right place.

## Equipment leasing benefits

### Get your equipment fast

We'll review your application and have a decision on your lease faster than any financial company in the industry. How fast? We'll typically notify your equipment dealer that payment is on its way upon 48 hours of your approval. You just sit back and wait for them to deliver your equipment.

### Increase buying power

Leverage your buying power and free up cash with periodic payments rather than one upfront purchase. You can also add extra features or accessories to your equipment for a small payment increase. Now that's putting the POW in Buying Power!

### Control your cash flow

Small payments over the term of your lease means your equipment will start earning you money while you pay it off, making it easy to balance your expense to revenue ratio.

### Seasonal payment options

At CWB National Leasing, we're all about flexibility. That's why we'll structure your payments, seasonally, semi-annually or annually to match your revenue.

### Potential tax savings

In many instances, leasing provides a business with income tax benefits by allowing you to expense lease payments rather than depreciating the capital cost of equipment. Always consult your tax advisor to find out how leasing can benefit the tax position of your business.
